

The new storage shed has been built to store our increasing fleet of machinery.

The furthest net on the 1st has been installed and we plan to complete the 2nd net on this hole in the week ahead.

The net on the 7th will also be repaired during March.

The area to the right of the 2nd hole has been cleared and looks much tidier. This seems to be a popular place to lose a ball.

We found plenty here!
The left of the 6th green has also had a makeover and we plan to move back the OOB stakes closer to the fence line.

New winter tees have been installed on the 7th and 18th holes.

Our Plan is to upgrade the winter tee on the 5th next.

New steps have been added to the 12th (Yellow and White) and 17th holes (Red, Yellow, and White).

These are both safer and much tidier.

The white tee on the 17th is in the process of being cleared. The sleepers need additional supports so that we can use the back section of this tee again. We plan to make a feature out of this tee.

The refurbished ball cleaners look as good as new and represent another improvement to many of our holes.

Please follow the 4 R's to help our Green Keepers and improve our course.

Please adopt the 4 R's this year

RAKE **Your Bunkers.**

REPLACE **Your Divots.**

REPAIR **Your Pitch Marks.**

REMIND **Your Playing Partners.**

Help Us all improve Our Course.
